**The Barcelona-based**

studio *SeriesNemo* conceived **Swell** with the formal continuity of a flower in mind. The pendant's beech stem gracefully morphs into an expanse of translucent polypropylene reminiscent of a delicate blossom; LED or FLC lamping offers sunny warmth. Adding a dash of color is the red fabric cord securing the 17 3/4-inch-diameter pendant to its white canopy; try corraling a cluster at varying heights. **Swell**, like all the Spanish manufacturer's products, is made entirely by hand.
